FROM CONCEPTION TO CONSTRUCTION

When you work with **ACJ** Group to get your garden pod, you're in safe hands.

ACJ design team use precision modeling software on every project and the latest 3D computer systems, eliminating waste and errors upfront, enhancing efficient production and construction. This allows you to see an accurate view of your pod, so you can make informed decisions, with no surprises.

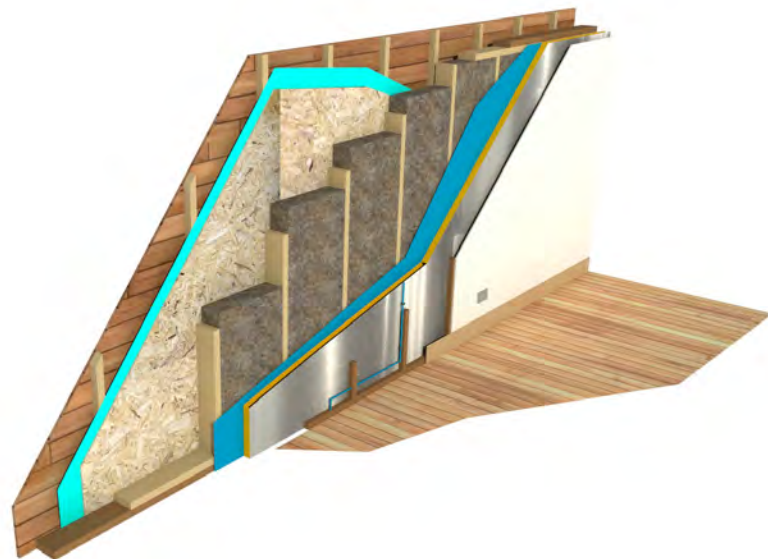

Any of the designs shown on our website can be fully customised to your own, or your client's, requirements. **ACJ** design team will work with you to develop a design that meets your brief and is within your budget.

QUALITY PRODUCTS

Unlike many solutions on the market, these aren't just wooden sheds, **ACJ** garden rooms and pods are designed using the same range of wall systems, windows and doors as our homes, meaning that your garden room is insulated, draught proof and secure.

ACJ wall systems offer a cost-effective, energy-efficient solution. You have the option to upgrade to a higher specification system, offering superior energy efficiency, which will keep your energy bills to a minimum. We can help you select the right pod solution for your needs and budget.

YOUR COMPLETE DESIGN & BUILD SOLUTION

POD PRICE COMPARISON

If you've been researching your options, and have a price from a competitor, you may be surprised to learn quite how much you get from an **ACJ** garden pod, in comparison with suppliers.

We don't cut corners and we won't compromise our quality or our professional reputation for the sake of a quick sale, but we will happily review any quotation that you may have received from an alternative supplier and offer a like for like comparison.

Show us the specification that you've been given and we'll endeavour to create a like for like quote, allowing you to make an informed decision about the right pod for your project.

CUSTOM DECKING

ACJ Group can design your entire garden producing custom features and decking to suit your requirements, house location, and budget. We can even price for an entire garden re-build incorporating custom pods designs to suit your needs.

CREATE YOUR VISION

Imagine being able to see not just the paper plans for your pod, not just a 3D computer model of your pod, but a photorealistic visualisation of your new garden space with your choice of finish, set in your desired location.

ACJ design team uses the latest computer modeling systems to create your vision. From the initial 2D plans we create 3D wireframe models, from there we render the projection, adding colour and textures to create a realistic 3D model. We can even superimpose that model into an image of your plot, creating a powerful visualisation of your final result, meaning you can make informed choices about design features and finishes in advance of construction.
